Do not use chemicals for cleaning.

Avoid direct sunlight / continuous light. These may cause colour fading.

Extra care required in vertical pasting of laminates sheet as there is possibility of bubbles due to lack of uniform pressure.

Cracking at corners and around cuts may be caused by improper conditioning, improper bonding, poor planning. Avoid all these to prevent cracking at corners.

## Notes:

All tests may not be valid for metallic Laminates.

Samples pasted, represent only colour, pattern and finish, not actual thickness. There may be slight variation in shades in batch to batch, particularly in Metallic designs.

Bonding of laminate under high humidity, plywood with high moisture content, ply with uneven surface, inferior quality adhesive and insufficient pressure may lead to delamination/ air bubbles in between ply and laminate.

Luxe + warrants that its product are free from manufacturing defects and they are fit and suitable for usual purpose under normal and proper use. The product must be inspected prior to installation and our liability will be limited to the extent of the product only.
