Kajaria LAMINATES
STRENGTH IN BEAUTY

TOWARDS NEWER
HEIGHTS

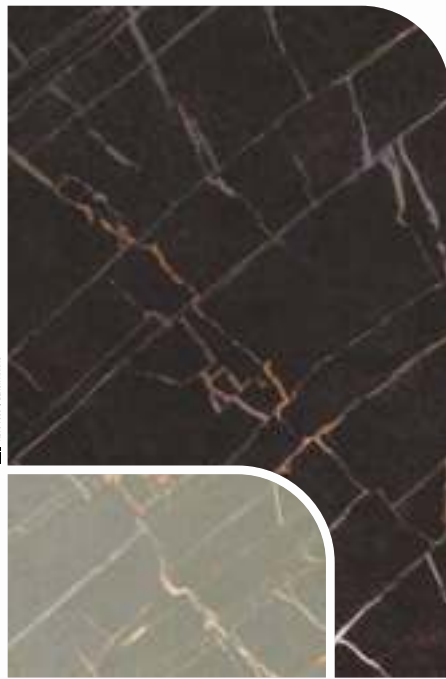

Kajaria is the largest manufacturer of ceramic/vitrified tiles in India with an annual capacity of 70 million square meters, distributed across eight plants. All of Kajaria's manufacturing units are equipped with latest modern technology, making their products one of the most desirable building materials in this industry. Founded 32 years ago, Kajaria has since then grown stronger with its hard work, innovations and patronage from its discerning customers. With the Indian consumers' rapidly growing appetite for quality building materials, Kajaria believes in expanding its horizon continuously.

After championing the tiles segment, Kajaria entered the bathware category with Kerovit. Thereafter, the company forayed into the category of wood panel products in 2018. And now, after understanding and catering the wood panel customers across the length and width of the country for more than 3 years, it is set to make a mark in the field of laminates.

The inspiration behind every Kajaria product is to exceed customer expectations and market demands while conforming to the finest standards of quality, service and innovation. Keeping up with the same objective, the company had established Kajaria Plywood Pvt. Ltd. (A subsidiary of Kajaria Ceramics Ltd.). This venture has been offering various wood panel products under the brand name of KajariaPLY. With an unwavering commitment towards quality, the brand has strived to adopt the finest standards of the modern times. Be it technology or research, it has set its sight on all these factors adopting the optimal production techniques in order to deliver the right quality of its products, making them customer-centric.

FAQS

Reasons for air bubble formations on Acrylic Sheets

Acrylic are bonded in extremely humid conditions

Use of water base synthetic resin adhesive any other than PEVA (Polyethylene Vinyl Acetate Co-polymer)

When substrate loses moisture after installation

Debonding in certain areas because of uneven substrate surface

Insufficient or lack of pressing during the bonding period of laminate

Use of extremely large acrylic/PVC laminate sheets (more than 8 ft x 2ft long)

To avoid delamination / air bubbles in between ply and laminate the above steps should be taken care of. Bonding of acrylic sheets should be completed under high humidity.
